

PROFILE OF INNOVATION

Schluter® Seminar

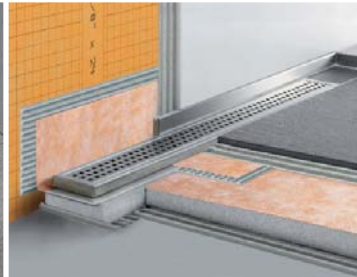

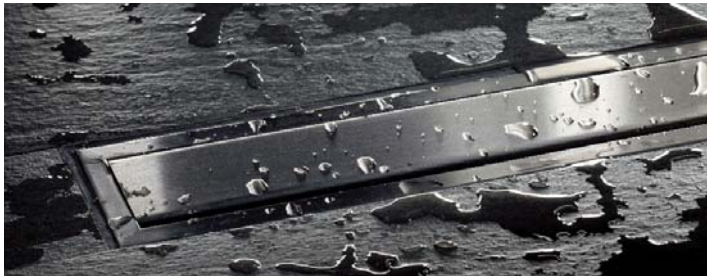

The Technology Behind the Tile

Schluter®-Systems along with Dal Tile will be hosting a Seminar on Schluter®-DITRA, DITRA-XL, and KERDI membranes, as well as Schluter®-KERDI-LINE and Schluter®-KERDI-BOARD. Join us for a catered breakfast and learn how these systems are installed. FREE GIVEAWAYS!

Date: Tuesday, January 24, 2012

Time: 8:00 a.m. - 11:00 a.m.

Location: Dal Tile – 105 Owens Industrial Drive, Suite A, Savannah, GA 31405

Schluter®-KERDI-LINE

A low profile linear floor drain specifically designed for bonded waterproofing assemblies. KERDI-LINE can be installed adjacent to walls or at intermediate locations in showers, wet rooms, and other applications that require waterproofing and drainage. The floor can be sloped on a single plane to KERDI-LINE, which enables the use of large-format tiles and creates interesting design opportunities. 3 grate assembly designs available: closed, perforated, or frameless tileable.

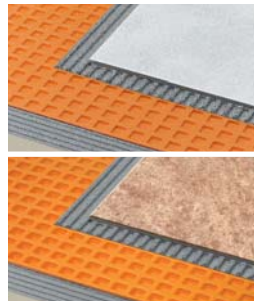

Schluter®-KERDI-BOARD

Whether you work with mosaics or large-format tiles, an absolutely flat substrate with straight and precisely aligned inside and outside corners is essential for creating a perfect tile covering - which tile installers can now achieve on their own, using Schluter®-KERDI-BOARD. KERDI-BOARD is waterproof and dimensionally stable, as well as lightweight and easy to work with. Substrate, building panel, bonded waterproofing... discover the possibilities!

Shower System

Waterproofing is the foundation of a successful tiled bathroom. Moisture-sensitive construction materials must be protected from water and vapor penetration to prevent damage, and the growth of mold. Learn about the Schluter®-Shower System – an integrated family of products that create fully waterproof and vaportight enclosures for tiled showers, steam showers, and bathtub surrounds.

DITRA & DITRA-XL

Learn how a multi-functional underlayment produces tiled floors that will last a lifetime. Specifically designed for ceramic and stone tile, Schluter®-DITRA and DITRA-XL provide uncoupling, waterproofing, vapor management and load support – the 4 essential functions for a successful installation.
