

PROFILE OF INNOVATION

Schluter® Seminar

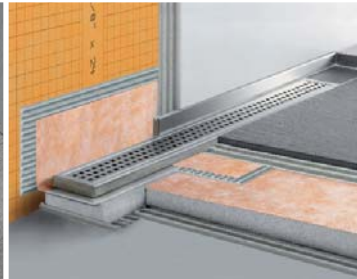

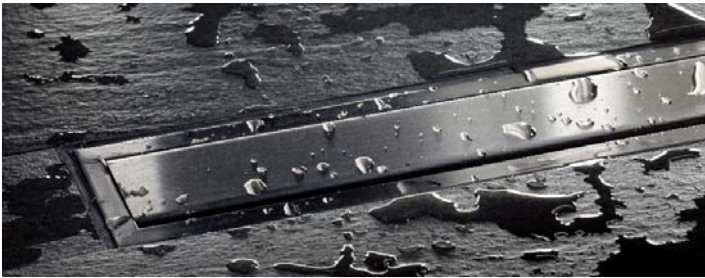

The Technology Behind the Tile

Schluter®-Systems along with Dal Tile will be hosting a Seminar on Schluter®-DITRA, DITRA-XL, and KERDI membranes, as well as Schluter®-KERDI-LINE and Schluter®-KERDI-BOARD. Join us for a catered breakfast and learn how these systems are installed. FREE GIVEAWAYS!

Date: Wednesday, January 25, 2012

Time: 8:00 a.m. - 11:00 a.m.

Location: Dal Tile – 2261 Technical Parkway, Suite B, Charleston, SC 29406

Schluter®-KERDI-LINE

A low profile linear floor drain specifically designed for bonded waterproofing assemblies. KERDILINE can be installed adjacent to walls or at intermediate locations in showers, wet rooms, and other applications that require waterproofing and drainage. The floor can be sloped on a single plane to KERDI-LINE, which enables the use of large-format tiles and creates interesting design opportunities. 3 grate assembly designs available: closed, perforated, or frameless tileable.

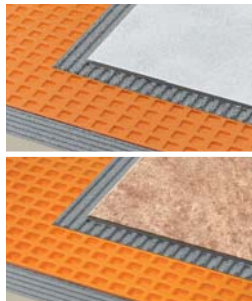

Schluter®-KERDI-BOARD

Whether you work with mosaics or large-format tiles, an absolutely flat substrate with straight and precisely aligned inside and outside corners is essential for creating a perfect tile covering - which tile installers can now achieve on their own, using Schluter®-KERDI-BOARD. KERDI-BOARD is waterproof and dimensionally stable, as well as lightweight and easy to work with. Substrate, building panel, bonded waterproofing... discover the possibilities!

Shower System

Waterproofing is the foundation of a successful tiled bathroom. Moisture-sensitive construction materials must be protected from water and vapor penetration to prevent damage, and the growth of mold. Learn about the Schluter®-Shower System – an integrated family of products that create fully waterproof and vaportight enclosures for tiled showers, steam showers, and bathtub surrounds.

DITRA & DITRA-XL

Learn how a multi-functional underlayment produces tiled floors that will last a lifetime. Specifically designed for ceramic and stone tile, Schluter®-DITRA and DITRA-XL provide uncoupling, waterproofing, vapor management and load support – the 4 essential functions for a successful installation.
